TOWN WARRANT.

STATE OF NEW HAMPSHIRE.

To the Inhabitants of the Town of Plymouth, in the
[L. S.] *County of Grafton, in said State, qualified to*
vote in Town Affairs :

YOU are hereby notified to meet at the Town Hall in said Plymouth, on Tuesday, the eleventh day of March next, at ten of the clock in the forenoon, to act upon the following subjects :

1. To choose a Moderator, to preside in said meeting.
2. To choose all necessary Town Officers for the year ensuing.
3. To raise such sums of money as may be necessary to defray town charges for the ensuing year, and make appropriation of the same, including free text books and other supplies for the public schools.
4. To see what sum of money the town will vote to raise or appropriate for decorating soldiers' graves.
5. To see if the town will vote to raise the highway tax in money and how much and in what way it shall be expended.
6. To see what sum of money the town will vote to raise or appropriate for lighting the streets.

7. To see what sum of money the town will vote to raise or appropriate to pay firemen.
8. To see what sum of money the town will appropriate for school purposes.
9. To see if the town will authorize the selectmen to borrow money to pay the debts of the town and give notes for the same countersigned by the town treasurer.
10. To see what sum of money the town will vote to raise or appropriate to aid in building a tower on the new State Normal School building for the town clock.
11. To see if the town will vote to exempt from taxation for a term of years the capital of Rollins & Calley used in the manufacture of gloves.
12. To see if the town will vote to discontinue the highway leading from the west line of land formerly owned by J. J. Sanborn to Loon pond.

Given under our hands and seal, this twenty-second day of February, in the year of our Lord eighteen hundred and ninety.

A. J. McCLURE,	} <i>Selectmen</i>

BOARD OF HEALTH.

The Board of Health respectfully submit the following :

There have been reported during the past year three cases of diphtheria of mild form, fifteen cases of scarlet fever, all with one exception of mild form and eight cases of typhoid fever. Not one of all these cases proved fatal.

In our efforts to control and prevent the spread of these diseases where we have had occasion to use our influence, we have followed as nearly as possible the methods recommended by the State Board of Health.

Although we have had a larger number of cases of the so-called infectious diseases than usual, during the past year, we have reason to congratulate ourselves that none have been fatal.

There have been only 22 deaths town in during the year and these with one or two exceptions the result of chronic diseases or deaths of aged people.

A specimen of the aqueduct water was sent to the state chemist for analysis and reported good. The analysis, however, showed more the effects of surface wash than that of the year before.

We would again, as last year, urge the importance of better surface drainage about the new reservoir. There have been improvements made by way of grading and improving the appearance of the grounds, but practically nothing has been done to eliminate the surface water. We wish to call the attention of the citizens of Plymouth village and especially of our successors, to this subject.

HIRAM CLARK,	}	<i>Board of Health.</i>
JOHN N. MUDGETT,		
HAVEN PALMER,		

REPORT OF HIGHWAY SURVEYORS.

It will be three years May 1st, 1890, since the present system of managing the Highway Department was put into operation. During the first two years there was considerable criticism, of the new order of things, but as the new system became better understood, and its results became more and more apparent, criticism has given place to general commendation. This, of course, is very gratifying to the surveyors.

Some of the more important permanent improvements of the past year have been: the widening at the top, grading macadamizing, and paving gutters of Ward's hill at an expense of about \$400. Grading, macadamizing, and paving gutters of north end of Russell street, at an expense of about \$150. Improvements on sidewalks at an expense of about \$350.

A large amount has been expended on roads in the back districts, in addition to highway tax raised in said districts.

The amount standing to the credit of this

department, as per last report,	\$1153 77
Highway tax for 1889,	3703 25

Amount available,	\$4857 02
Expended for year,	3880 06

Balance available coming year,	\$976 96
--------------------------------	----------

We respectfully recommend that one-half of one per cent. tax payable in money, be raised for highways the coming year.

Respectfully submitted,

A. M. KIDDER,	} <i>Highway</i>
A. J. McCLURE,	
A. W. AVERY,	

REPORT OF FIREWARDS.

PLYMOUTH FIRE DISTRICT FOR THE YEAR ENDING MARCH 1, 1890.

There has been a good supply of water during the year.

The District has again been favored in regard to fires, there having been only one alarm during the year, to which the Hose Company promptly responded and in a very short time had two lines of hose laid ready for business but fortunately the water was not needed, as the fire was already under control.

It is the opinion of the Firewards that the District should purchase a "Ladder Truck," that the ladder which hung in the Hose House and which has never been used (for the want of a truck,) may be available in case of fire, as a ladder is one of the first things wanted at a fire.

Pemigewasset Hose Company No. 1, consisting of twelve men, never was in better working condition than at the present time, and with the addition of a Ladder Truck their apparatus would be completed and the Company could do much better should occasion require.

SCHOOL REPORT.

The number of pupils enrolled in the public schools during the past year was 392 of which 242 attended the village schools and 150 the schools outside the village. Compared with the year ending March 1, 1889, this shows an increase in total membership of 44 scholars of which addition the village schools received 26 and the schools outside the village 18. The average attendance, as will be seen by the accompanying statistical table, was better than the year before, the highest per cent. being 96 and the lowest 78, while the last report shows the highest per cent. as 92 and the lowest 71.

There is, however, a much needed appreciation on the part of parents of the superior school advantages afforded in this town. The school registers shows too many tardy and absent marks that might have been avoided had parents been duly considerate of the future welfare of their children and willing to make temporary sacrifice at home in order that their offspring might enjoy the benefit of an unbroken course of study. Too often a child is detained from school to run on errands and perform ordinary manual labor; this not only keeps the child back in his studies but hinders the progress of the whole class. The compulsory attendance feature of our school law is the merest farce. We are far behind the so-called effete monarchies of the old world in this particular, while Republican France is decidedly in ad-

vance of New Hampshire in the intelligence of her laws relative to the attendance of children in the public schools. No scholar should be kept from school a single day unless by illness, unavoidable accident, or the most pressing and exceptional necessity, and citizens would be doing the children and the State a valuable service by creating a public sentiment in favor of more stringent legislation relative to compulsory attendance in our public schools.

The excellent character of the schools has been well maintained throughout the year, except in one instance and in that case, the Board deem it well to state, the trouble experienced cannot be attributed to the neglect of the teacher employed, but arose from an erroneous conception on the part of some parents, of their responsibility for the conduct of the school in question. It is unfortunately true that the best efforts possible are at times unsatisfactory to those whose activity is aroused only when a real or fancied opportunity is presented for adverse criticism. If one-half the energy was expended in endeavoring to assist and sustain the teacher while striving to promote the welfare of a school, as is occasionally exerted to exhibit a questionable knowledge of methods superior to those employed, the teacher's task would be greatly lessened, and the usefulness of the school greatly increased. In this case, we regret to say, no such idea seemed to have been entertained, or personal opinions were regarded as of more importance than the success of the school. It is a pleasure, to state that scholars who remained throughout the term were found well instructed.

TEXT BOOKS AND TEACHERS.

An act was passed during the last session of the legislature providing for free text books and supplies to be furnished for the use of the scholars at the expense of the town. This law went into effect January 1st last. Becoming oper-

ative in the middle of a school term no immediate action under it was deemed advisable. To carry its provisions into effect, an appropriation will be necessary, and estimates of the amount required will be submitted at the annual town meeting. Although this law permits a complete change in text books used, the Board will introduce only such changes as seem to warrant substantial advantages over the books now in use. It is the opinion of the Board that in the selection of text books, the local character of our schools and the ability and general qualifications of such teachers as the town is able to employ, are to be carefully considered. It is the opinion of some educators that a \$7.50 per week teacher with an easy flow of language, supplied with a piece of chalk and ample black board room, can make good scholars of the average district school children without the material aid of text books; that rules and definitions, found in text books, embodying the most mature thought, expressed in the most concise and intelligent language, are stumbling blocks to the scholars; that the teacher fresh from school herself, crammed to congestion with theory, but with little or no practical experience in the work of instruction, is the living speaking book from which all knowledge is to flow. The children are to sit in a sort of delightful trance, drink in without special effort the inspiring thoughts, facts and figures contained in the teachers' talk or lecture and by some unexplained magic, be developed into accurate, ready and self reliant scholars. We dissent most emphatically from such views. We believe that no person was ever made learned and scholarly without long and patient study of the books, that common school teachers can, at best, only supplement the teaching of books. We believe in text books with rules and definitions, illustrations and practical examples. We believe in teachers who believe in such text books and who do not think they know more than these books

contain on every subject, and more than the learned and experienced authors who wrote them. We believe in teachers who give out lessons in text books to their pupils, insist upon their being thoroughly learned and are not afraid of being considered unpopular if they advise scholars to take their books home at night and study their lessons. It is our purpose to adopt this kind of books and employ such a class of teachers, if we can find them. We shall not, however, advertise for a \$2000 college professor, or his college methods to fill a \$255 position in our mixed district schools.

SCHOOL HOUSES AND SUPPLIES.

The Sargent school house has been repaired and a vault constructed for the same; the grounds have been graded also. Further repairs will be needed on the blackboards and the effects of certain vandalism committed on the exterior of the house and on the fences by some of the scholars, will be effaced at their expense. A new fence has been built about the school house lot in the Turnpike district and the school ground properly graded. The materials also for a new fence around the Ward Hill school house lot have been purchased and delivered upon the ground, and the fence will be built the coming season. The large appropriation made by the last legislature for the erection and equipment of new buildings for the Normal and model schools in the village district will enable the able board of building commissioners to provide excellent accommodations and much needed room for our village graded schools. The plans and specifications for these buildings have been accepted and the work of construction will begin in the early spring. We trust before the issuance of our next annual report our village children will be emancipated from the miserable old trap called a school house with its cramped, ill-ventilated

and poorly-lighted rooms, which they now occupy, and will be enjoying the commodious and pleasant quarters provided in the new building. The location of this new school house on the boarding house level and the demolition of the present school structure will afford a beautiful and roomy frontage where our children, we hope, may be permitted to breathe the out door air and have a little harmless amusement without invading the precincts of public streets or private property, or wounding the sensibilities of the most delicate and fastidious natures.

HIGH SCHOOL.

Before closing this report we feel constrained to call the attention of the town to the growing indifference of our boys to the advantages of our excellent High School. During the last year, among 242 pupils attending our graded schools not a single boy graduated from the High School department. Boys drop out all through their school course to work in stores and markets, drive job wagons, and do work at almost anything rather than attend school. Some appear to have nothing better to do than loafing about the streets. This reveals a lack of manly ambition, good sense, and scholarly taste on the part of our boys which they ought to be ashamed of, and an ignorant, weak indulgence on the part of parents which is a standing reproach to the town. They ought to know without any reminder how unkind it is to permit these boys to ignore these educational advantages which are now so accesible and inexpensive, and send them out into the world imperfectly educated, weak and limping to compete in the hard struggle of life with those whom nature has no better endowed, but who have the superior equipment which the highest schooling and most thorough intellectual training can give. If nothing else can stimulate the boys to greater zeal in education and more persistence in

acquiring it, we trust that the repeated and public spectacle of our ambitious and high-minded girls, winning all the high school diplomas, will be sufficient to awaken their dormant pride and lead them to put forth masculine effort enough to refute the idea which is fast gaining ground that, although they are boys in sex, they are less than girls in grit and determination.

HIGH SCHOOL COURSE OF STUDY.

NINETH YEAR OF THE COURSE.

(First year of High School.)

Reading Some book appropriate for elocutionary drill; selections, giving a brief outline of modern English and American literature.

N. B.—Not all the books named in the course of supplementary reading in the various grades are to be studied in the schoolroom, but these, and more, if possible, are to be read under the direction of the teacher.

First Half-Year. English Composition and grammar; Readings from American and English History; Book-Keeping; Elementary Science.

Second Half-Year. English History; Commercial Arithmetic and review of Arithmetic; Form and Practical Geometry; Elementary Science.

Drawing. Working Drawings; plans drawn to scale; rectangular objects at different angles; groups of objects; construction; bi-symmetric ornaments; light and shade.

TENTH YEAR.

First Half-Year. Latin; readings in History and Literature; Form and Geometry.

Second Half-Year. Latin; Geometry; Civil Government; Botany.

Drawing. Working drawings and problems in projection; objects in oblique and angular perspective; historic ornament; application of plant forms in design; light and shade; color.

ELEVENTH YEAR.

First Half-Year. Latin; Algebra; Physics; History of Greece.

Second Half-Year. Latin; Algebra; Botany; History of Rome.

Drawing. Elements of construction; natural forms in light and shade; study of plant forms from nature, and study of the scroll.

TWELFTH YEAR.

First Half-Year. Mental Philosophy; Geography, physical and astronomical; Chemistry.

Second Half-Year. Review of Mathematics; Physiology.

Drawing. Continue work of eleventh year.

Music. During the ninth, tenth, eleventh, and twelfth years practice of chorus music and other musical exercises.

Exercises in composition, writing, reading, and exercises in applications of arithmetic, throughout the course. Special subjects, from time to time, treated by oral lessons or lectures. Two or three selections of literature of considerable length, typical of the best authors and styles, carefully memorized and recited each term.

There shall be much writing throughout the course above the lower grades on subjects connected with school work, and careful attention shall be given to the selection of such reading, and the adoption of such modes of reading, as will cultivate purity of style and clearness and purity of thought.
